HTML Headings

HTML provides six levels of headings, from <h1> to <h6>. These define the importance of the heading, not the appearance.

<h1> is the most important heading.

<h6> is the least important.

Example:

<h1>Main Title</h1>

<h2>Section Title</h2>

<h3>Subsection Title</h3>

<h4>Minor Heading</h4>

<h5>Small Heading</h5>

<h6>Smallest Heading</h6>

SEO Tip:

Search engines use headings to understand the content hierarchy, so use them logically and meaningfully.
