HTML Lists

HTML supports three types of lists:

1. Ordered List (<ol>) - Numbers the items

Example:

```
<ol>
<li>Step One</li>
<li>Step Two</li>
</ol>
```

2. Unordered List (<ul>) - Uses bullet points

Example:

```
<ul>
<li>Apples</li>
<li>Oranges</li>
</ul>
```

3. Description List (<dl>) - Defines terms and descriptions

Example:

```
<dl>
<dt>HTML</dt>
<dd>HyperText Markup Language</dd>
<dt>CSS</dt>
<dd>Cascading Style Sheets</dd>
</dl>
```

Use lists to organize content, navigation menus, and step-by-step guides.
